

www.flydor.co.uk

A chain curtain consists of an anodised hanging bar holding coloured aluminium chains via holes in the top hanging bar, giving superb durability against weather and cleaning.

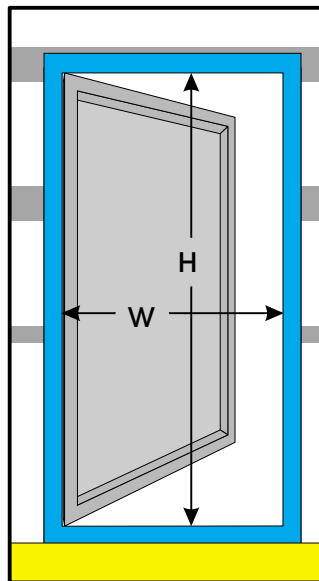

The Curtain is suitable for Domestic and Commercial applications and is easy to install or remove when not required, offering good pedestrian access and excellent air-flow, whilst preventing the access of insects??

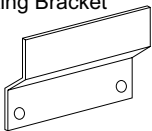

Measurements

Strip Curtain Screens.

Measure the opening of the door as shown. For Height (H) add the thickness of the head frame and deduct 10mm to 20mm, so curtain will not scrape the floor. For Width (W) add sufficient to overlap the opening, usually 25mm to 50mm overall.

1033.3
Fixing Bracket

Colours:

The hanging rails is available in silver or black, whilst the chains are silver, black, dark blue or bottle green. These can be used as single colour curtains or in varying colour combinations as required.

Our chain curtain is available in various formats; components are available separately or in boxed kits for self-assembly. Alternatively, we offer a full manufacturing service with curtains assembled to your finished size. Fixing brackets are then supplied for fitting to your desired application. We recommend that curtains over 1000mm wide be made in two parts.

Order Codes

Code	Description
C5201.0	Chain Hanging Bar Silver Anodised Finish 4000mm
